

*Dundee Precious Metals Tsumeb (DPMT) proposes to optimise and upgrade the current smelter operations in Tsumeb in order to increase the copper concentrate throughput capacity from 240 000 tons per annum (tpa) to 370 000 tpa.*

*DPMT appointed SLR Environmental Consulting (Namibia) (Pty) Ltd (SLR) to undertake the required Environmental and Social Impact Assessment (ESIA) Amendment process for the proposed project.*

*The scoping phase of the process was completed (taking interested and affected parties' comments into consideration), after which various specialist investigations were conducted.*

*You are hereby notified that the specialist information has been collated into a Draft ESIA Report and made available for a formal review and comment period from 19 April to 29 May 2017. For your reference, a copy of the Executive Summary of the report is included here. Hard copies of the full report will be available at the Tsumeb Public Library and the DPMT Information Centre in Tsumeb. The full report is also available for download at the following link <http://slrconsulting.com/za/slr-documents/tsumeb-smelter>  
Or: <http://www.dundeeprecious.com/English/Operating-Regions/Current-Operations/Tsumeb/Documents/default.aspx>*

*For comments to be included in the Final ESIA Report to be submitted to the Namibian Ministry of Environment and Tourism, they must reach SLR at the below contact details by no later than 29 May 2017.*

*SLR Contact Person:*
